To Whom It May Concern,

I have known Ms. Yekta Sadeghi for more than two years. She demonstrated herself as a very bright and interested Student, researcher, and she always involved with challenging discussions during her design and research projects and placed at the top of my research group so this is my honor to recommend Yekta for pursuing her Master and PhD studies at your university.

She participated in the most of her field experiment and data gathering. She has shown herself very sharp and curious in learning, so that she has got many skills in a short period of time, and I'm sure she will be successful in any academic endeavor. Meanwhile, I was a professor of her B.A thesis, which allowed her to score a very high score (19.25/20) and she could defend from her thesis very well.

In addition, Yekta is very communicative, trusting and likable with a great self discipline and sense of humor. Therefore, if you are looking for a hardworking and self-motivated, I believe that Yekta is the right person you need, who has worthwhile experiences in Architectural design, Research and computational programming coupled with experimental works. These are the reasons that I strongly recommend her for your program and your university. If you need more information do not hesitate to contact me.

Yours Sincerely,

D.R. Sarah Sohangir,

Assistant Professor, Researcher and Faculty member of Parand University, Ph.D of Architecture.

Architecture College of Islamic Azad University of Parand
